Elevate your Building with MV Lifts

Enhance Accessibility with Inclusive Design

Invest in a new lift installation to unlock accessibility for every individual entering your building. Our lifts comply with EN81-70 and Part M regulations, ensuring accessibility standards are met. User-friendly control systems enable effortless navigation.

Tailored Quotations, Exceptional Service

At MV, we take pride in delivering personalised and tailored quotations to match your specific requirements. Our customer service and technical expertise offer peace of mind throughout the lift installation process. Trust us for meticulous attention to detail, professionalism and dedicated support.

Green Solutions for a Sustainable Future

Reduce environmental impact by choosing our eco-friendly lifts. Featuring battery-powered lifts, regenerative drives, LED lighting, and powered shaft ventilation, our solutions optimise efficiency, save on energy bills and minimise your ecological footprint.

Versatile Expertise for Every Building Type

No matter the building type – office, hotel, residential, hospital, retail, or educational facility – our highly qualified engineers are ready to install your lift with skill and precision. Our team undergoes specialised training in both technical expertise and customer service, ensuring respectful and courteous treatment of your premises.

Increase Property Value

Investing in a new lift effortlessly increases property value. Modernise your establishment with a future-proofed, accessible, and convenient building. Prioritise accessibility and convenience to position your property as an attractive investment.

Safety First with Compliance to EN81 Regulations

Your safety is our top priority. Our new lifts strictly adhere to the latest EN81 regulations, tailored to your building's specific requirements. Incorporating state-of-the-art components, we guarantee a secure, smooth, and seamless journey. Rely on our lifts to meet the highest safety standards and provide peace of mind for all occupants.

Upgrade for Long-Term Reliability

Replace aging lifts for 20-25 years of dependable service. Reduce breakdowns, save time and money, whilst maximising building efficiency.

Elevate Your Building With MV Lifts

Versatile Range for Every Need

> Size

MV Passenger lifts offer a versatile range accommodating 4 to 40+ persons, featuring customisable cabins in various sizes to meet your specific requirements.

If your building requires a customised structural lift shaft, we provide assistance. Our expertise and resources ensure the construction of a bespoke lift shaft tailored to your specific needs.

> Components

MV offers a range of independent lift components and manufacturers, providing extremely configurable lifts with benefits like customisation options, ease of maintenance, resource savings, versatility, and innovation.

MV components are open protocol, allowing any qualified maintenance supplier to work on our equipment. Distinguishable from major suppliers, we offer flexibility without drawbacks.

> Design

Lift design is crucial for functionality and ambiance. MV offers visually captivating and functionally suitable interiors with options such as glass, steel, paints, laminates, textures, murals, digital displays, lighting, handrails, and flooring.

> Surveys

Our experienced Sales team are happy to provide free surveys to help understand your building requirements and preferences. Through a collaborative approach, we offer a tailored quotation that perfectly suits your needs.

> Project Types

We provide services way beyond design and installation. We are happy to provide new lifts into new shafts as well as replacements. Our packages range all the way through to full turnkey packages.

Our turnkey packages coordinate building works, electrical installations, deliveries, and site management. We focus on meeting Construction Design and Management Regulations (CDM), providing a hassle-free experience from start to finish.

> Specialised Labour

Unlike many competitors, MV directly employs installation engineers and testers, ensuring high-quality control, consistent service, and long-term relationships built on trust.

Having directly employed engineers ensures that our project teams are specifically selected based on the type of project you opt for, ensuring the highest quality lift installation possible.
